📍 Istanbul, Turkey

SUMMARY

Strong foundation in JavaScript, Java and Python; skilled in AWS for developing microservices and managing cloud infrastructure. Experienced with PostgreSQL, DynamoDB, and Elasticsearch for database design. Competent in frontend technologies including Vue JS, HTML, and CSS, with a strong emphasis on UI design. Additionally, have hands-on experience in DevOps practices, including CI/CD pipelines, containerization with Docker, and infrastructure as code using AWS Cloud Formation.

EXPERIENCE

Software Engineering Intern

Mercedes-Benz

📅 06/2023 - 07/2024   📍 Istanbul, Turkey

- Developed Mercedes' internal API that provides analytics services to Mercedes' all internal APIs using Node JS.
- Designed UI with Vue JS, HTML, and CSS.
- Written unit tests for full coverage in SonarQube with Jest.
- Participated in agile development processes, effectively adapting to changing requirements while maintaining high-quality results.

DevOps Traniee

Vodafone

📅 05/2024 - 06/2024   📍 Istanbul, Turkey

- Designed and implemented containerization strategies using Docker and Kubernetes, improving resource utilization and management.
- Improved code deployment efficiency by automating processes with CI/CD pipelines.
- Managed cloud-based infrastructure, optimizing costs and ensuring high availability of services.

Backend Developer Intern

NovaDSA

📅 08/2022 - 06/2023   📍 Istanbul, Turkey

- Implemented new features for a cloud-based SaaS product, benefiting over 1,000 enterprise clients
- Reduced application load time by 25% by re-factoring inefficient code and optimizing front-end assets
- Initiated a corporate-wide code review practice, which improved code quality by 30%
- Contributed to the creation of a customer support chatbot using AI technologies, enhancing customer service response times by 40%

EDUCATION

Bachelor's in Computer Science

MEF University

📅 09/2021 - 01/2024   📍 Istanbul, Turkey

Bachelor's in Civil Engineering

Middle East Technical University

📅 09/2017 - 06/2021   📍 Ankara, Turkey

INDIVIDUAL PROJECTS

Goals App

This is a Dockerized full-stack application for managing goals. The backend is built with Node.js, Express, and MongoDB, while the frontend is built with React.
GitHub link: https://github.com/YigitCnCelik/goals-app

Bank App

Simple bank application with Spring Boot and Spring Data with CI/CD pipelines using Jenkins.
GitHub link: https://github.com/YigitCnCelik/Bank-App

Chat Bot

This Telegram bot project lets you chat with ChatGPT using AWS serverless architecture and Python.
